Program

Nagoya University
Education for Sustainable Development
Consortium Program with 6 Graduate Schools

Nagoya University Education for Sustainable Development Program (NU ESD Program) which relates to sustainable development (SD) education and research, was launched in 2013. Nagoya University now offers the ESD Program in collaboration with 6 Graduate Schools associated with SD, including the Graduate school of Environmental Studies, International Development, Bioagricultural Studies, Engineering, Economics and Humanities.

In 2014, the UNESCO World Conference on the UN's 10 Years of Education for Sustainable Development (ESD, 2005 - 2014) held in Nagoya. In 2015, the UN adopted the 2030 Agenda for Sustainable Development Goals (SDGs). SDGs have 17 goals which aim to end poverty, protect the planet and improve the lives and prospects of everyone, everywhere. And each goal has multiple targets, in all 169.

The Nagoya University Academic Charter states that we seek to, "Contribute to global exchange, especially

with Asian countries, by promoting international academic collaboration and the education of international students". We hope our students at Nagoya University will become the leaders of a sustainable future. To fulfill this role, basic understanding and sharing of values, principles, and knowledge in SD as part of their liberal arts study is crucial. And students must balance discipline-type and solution-type research and education related to SD.

Students admitted to a master's course in any of the graduate schools (Initial Postgraduate Program) may earn up to 10 credits in other graduate schools. Approximately, 1,160 students in total join this program annually, and about 140 of them take subjects at another graduate school in AY2023. Check the graduate school or department's provisions on courses for details.

Through the NU ESD Program, it is expected that students will be acquired the value and knowledge of SD, disciplines and skills to find solutions, and ability of simultaneously achieve multiple SDGs.
